**FIVE-A-SIDE  
SOCCER**

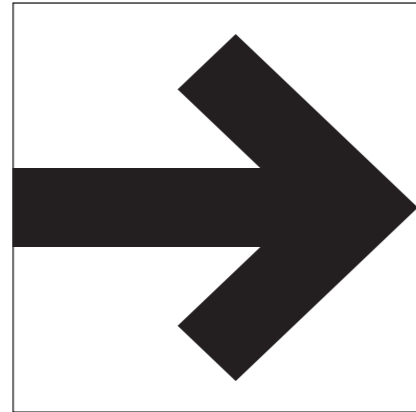

**indoor**  
**outdoor**

**DYNAMIC**  
Five-a-side soccer pitches let you play a very dynamic game, with a maximum of goals and a match with no injury time. Convivial and animated, this new form of football is played in short matches and allows each operator to book several teams per day on the same pitch.

**MADE TO MEASURE**  
Metalu Plast uses its expertise, built up over more than 35 years, to design the right pitch for your needs.  
**OUR PURPOSE**  
is to fit to your needs, while remaining reactive

The five-a-side soccer football pitch is adapted to the installation environment: indoor or outdoor. The pitch may be single, double or triple, etc ... which allows you to have several pitches in a fairly restricted space.

This product is labeled "Origine France Garantie"

**FIVE-A-SIDE**

**Main specification for the standard structure:**

- Corner posts and intermediate posts
- Separator posts for multiple pitches
- Strut for outdoor pitch
- Plastic-coated galvanized steel posts

**Types of posts:**

- Corner posts 5 m and intermediate posts 5.3 m above the ground
- Floodlight support devices
- Palisade posts, end walls, pitch separators: 1.17 m above the ground
- Strut for pitch: 2 struts/ corner post (single pitch), 3 struts/ for shared corner post for 2 pitches

**Types of panels:**

- Polyurethane sandwich panels for Monowall® cladding in plastic-coated galvanized steel, 60 mm thick, 1.15 m high. Color: consult us.
- Fixing : the panels slide into the U-shaped slots fixed on the posts. The panels are covered with an extruded aluminium profile, into which the net is inserted, without hooks, as the "STAR" type system.

**Fixing:**

- Direct sealing or embedding on base plates

**Goals:**

- 2 Goals 3 x 2 m (standard) Please contact us for other sizes
- White plastic-coated galvanized steel tube, with aluminium connector
- Stabiliser bar in lower section
- Standard color: white

**Compliance :**

- Compliant with Eurocode

**2 m height door:**  
*Standard: single door with lock*

- Width 1.50 m (standard) with 1.40 m of free passage
- Plastic-coated steel tube with antirust treatment

Filling:

- Upper section: welded wire 8/6/8 mesh 200 x 55 mm
- Lower section: Monowall® panel

*Optional: double door with lock*

- Width 3 m (2 doors of 1,5 m) with 2.80 m of free passage
- Plastic-coated steel tube with antirust treatment

Filling:

- Upper section: welded wire 8/6/8 mesh 200 x 55 mm
- Lower section: Monowall® panel

**Protective net, pediment net:**

- Lower section: Knotted net Ø 4 mm, mesh 120 mm, with standard overlock finishing
- Lower section: Knotted net Ø 4 mm, mesh 120 mm, with standard overlock finishing + Ø 6 mm halyard + woven reinforcement strips on eyelet on door cutout
- Nets tensioned by 5 mm coated steel cable, pulleys, split rings and turn-buckle ties

**Palisade nets:**

- Knotted net Ø 4 mm, mesh 120 mm, with standard overlock finishing + Ø 6 mm halyard + woven reinforcement strips on eyelet on door cutout
- Woven reinforcement strips in the lower section, to insert the net into the "STAR" system structural profile
- Nets tensioned by Ø 5 mm coated steel cable, pulleys, split rings and turn-buckle ties

**Roof nets:**

- Knotted net Ø 2.3 mm, mesh 120 mm with woven reinforcement

**Options:**

- Protective foam for the intermediate posts, the corner posts and the struts
- Integrated storage box for the pitch
- Floodlights

**Colors of the structure**

Soccer benefits from the "Color +" range, with some twenty colours to choose from and no extra charge!

**An eco-responsible action**

- Choice of non-polluting manufacturing process: non chemical pickling and no liquid paint, cutting oil or special powder paint
- High recycling rate of products
- Waste treatment by specialized companies
- Respect of the working environment of employees on production sites (eg filtering of welding fumes, custom made ear plug with frequency filtering...)
- Choice of vehicles with low CO<sub>2</sub> emissions

Metalu Plast Group was created in 1980. Leading French sports equipment manufacturer and sports enclosure. The production is realized on two 7,500m<sup>2</sup> site each, in Soliers and Potigny, Caen suburbs.
