## 1: ASSEMBLING LEGS AND TABLE

**A:** Place one leg at the end where there is no hole through the frame. Fixate the leg with M8x100 bolt, nut and washer. **B:** flip the assembly over, place the other leg underneath the frame. Insert the disc, and fixate leg and disc with M8x100 bolt, nut and washer.

### ATTENTION

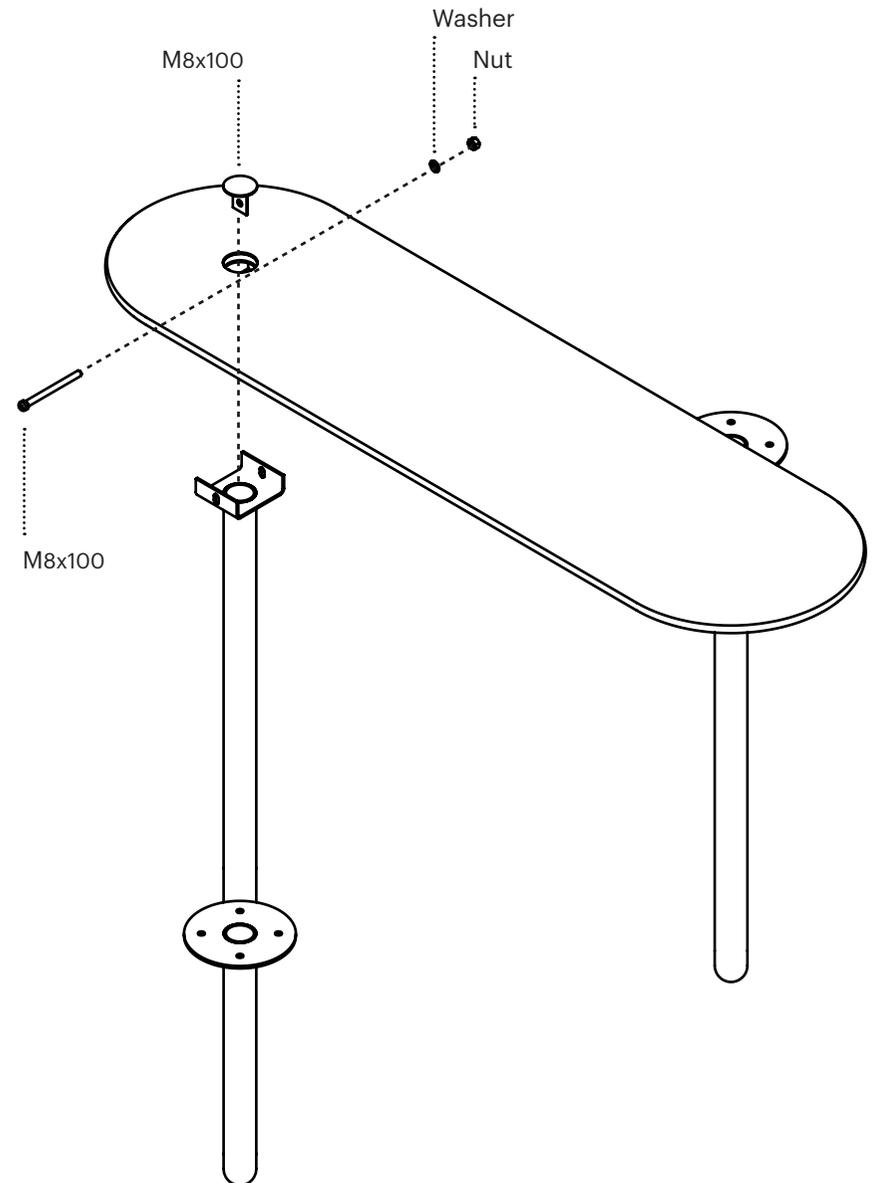

- Only place laminate on a safe, or soft surface to prevent damage to the laminate.

### Table and leg with flange

Make sure the flange is placed flat against the frame when firmly tightening the bolt.

**A**

**B**

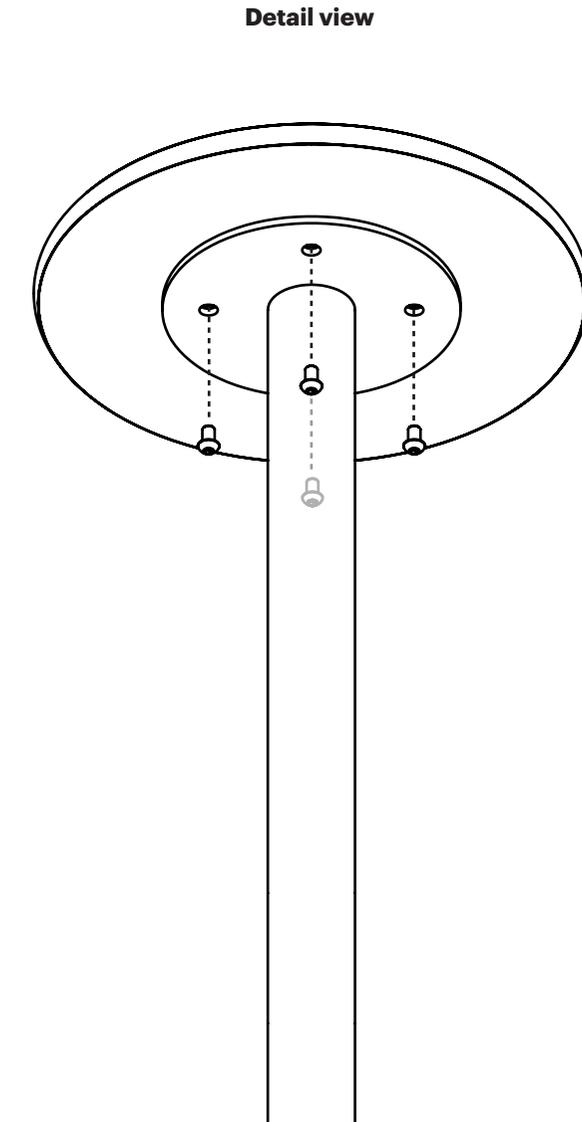

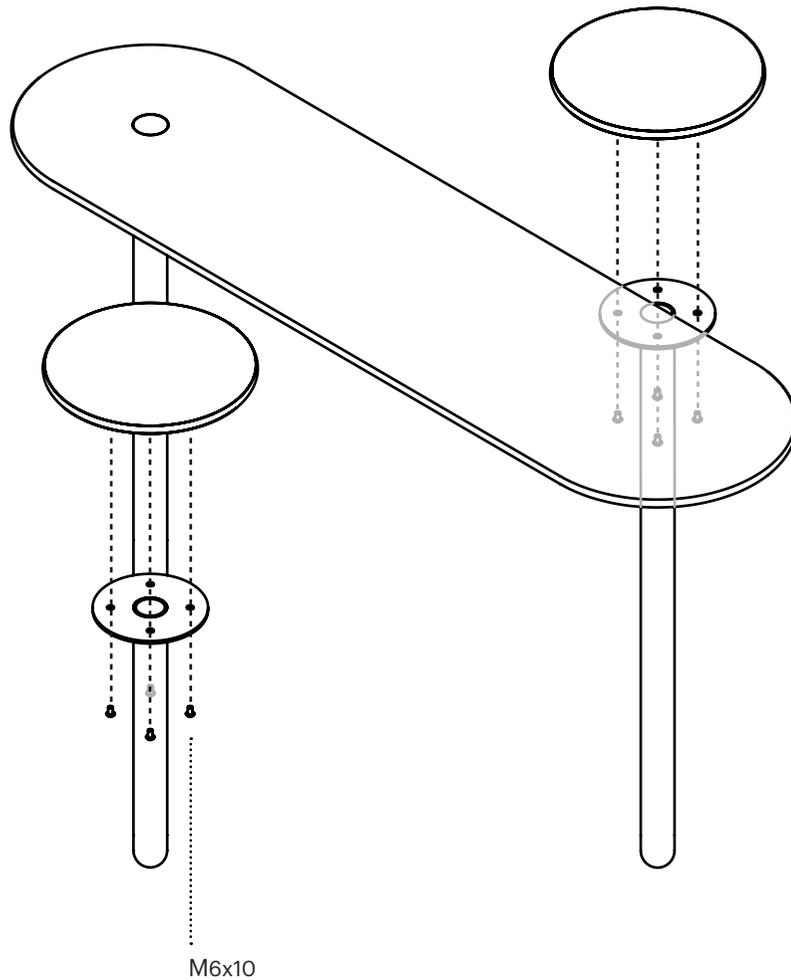

## 2: ASSEMBLING LAMINATE SEATS TO THE LEGS

Carefully place the two laminate seats on the flanges on the end of the legs. Use 4xM6x10 per seat to fasten them in place. Be careful not to overtighten the bolts, as the laminate might rupture (max 18Nm).

### ATTENTION

- Do not overtighten M6x10, as the laminate might rupture (max 18Nm).

## CLEANING

Clean the laminate surface with warm water and a soft sponge.  
NEVER use the abrasive "green" side of the sponge. Use an ordinary universal cleaner.

Difficult dirt must be removed with a nano sponge and water. Please take a closer look at our website, or contact us for information.
